

1 5kw pure sine wave inverter production

Overview

What is pure sine wave inverter?

Pure Sine Wave Inverter is one of the most recognizable technologies that has been utilized by both industrial and private sectors in Distributed Power Generation (DG) Systems . DG Systems are normally assisted by Photovoltaic (PV) systems and fuel cells on small scale .

How to generate a pure sine wave output from an inverter?

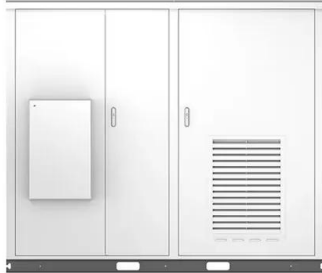

We use the Sinusoidal Pulse Width Modulation (SPWM) technique to generate a pure sine wave output from the inverter. We use the PIC16F877A microcontroller to generate SPWM. Then, feed these SPWM waves to the MOSFETs of the H bridge.

How much space does the inverter factory have?

12,000 square meters factory area, 15 subdivided production lines. Meet the requirements of inverter shape design, special power and voltage customization. Designated partners of more than 150 well-known brand enterprises, help their profits increase by up to 35%.

1 5kw pure sine wave inverter production

1kW-5kW Off-Grid Inverter

HF series is a new type of mixed solar energy storage inverting & control all-in-one machine integrating solar energy storage & municipal power charge ...
