

100MW energy storage project investment

Overview

The project, with a total investment exceeding €75 million, will leverage the expertise of Saft, TotalEnergies' battery affiliate, which will supply the latest-generation electricity storage technology (iShift LFP — lithium-iron-phosphate — containers). What is the 100 MW energy storage system?

The 100 MW system is an energy storage installation that will provide critical capacity to meet local reliability needs in the area, while helping California meet its environmental goals.

How much will totalenergies invest in new battery storage projects?

Credit: JeanLucIcard/Shutterstock. TotalEnergies plans to invest €160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity. The projects have been developed by TotalEnergies affiliate Kyon Energy. Most will utilise next-generation batteries from another TotalEnergies affiliate, Saft.

Who develops a new energy storage project?

The projects have been developed by TotalEnergies affiliate Kyon Energy. Most will utilise next-generation batteries from another TotalEnergies affiliate, Saft. Siemens Gamesa-Hamburg-Altenwerder - Electrothermal Energy Storage

Why did totalenergies develop a new storage capacity in Germany?

The development is a key step in TotalEnergies' efforts to enhance the flexibility of Germany's power system. The new storage capacity will help mitigate congestion and provide the necessary flexibility to support the rapid expansion of the country's renewable energy sector.
