Overview

What is a string inverter?

String inverters transform the direct current (DC) from your PV panels into an alternating current (AC) that can be fed into the electrical grid. String inverters are mostly used in residential and commercial solar projects such as rooftop, carport, ground mount and tracker installations.

What is the power range of a string inverter?

String inverters come in a power range between 2.5 kW and 250 kW. Company Profile Hefei Pinergy Solar Technology Co., Ltd is a professional and world-class manufacturer of crystalline PV modules. The business covers the R&D, production and sales of PV modules, solar power plants and PV system products, and O&M services, etc.

What is the efficiency of a string inverter?

The highest efficiency is 99%, and the efficiency in China is 98.58%. 6-channel MPPT, effectively reducing the impact of string mismatch. Product Parameters Recommended max. PV power Detailed Photos String inverters transform the direct current (DC) from your PV panels into an alternating current (AC) that can be fed into the electrical grid.

How many MPPT does a PV inverter have?

The inverter comes equipped with 12 MPPT, the highest available in the market, assuring maximum PV plant design flexibility and increasing yields also in case of complex installations.

Which string inverter has the highest power density?

The award winning three-phase PVS-175 string inverter, with the largest high power density within the 1500 Vdc segment, delivers up to 185 kVA at 800 Vac and can achieve an ultra-high power density of 1.3 kW/kg.

175kw string inverter price

Solar inverter PVS-175-TL

PVS-175-TL The PVS-175-TL is FIMER's innovative three-phase string inverter, delivering a six-in-one solution to enhance and optimize solar power generation for ground mounted utility ...
