

2025 Pack Battery Large Enterprise

Overview

How many high-voltage batteries will be produced in 2025?

From 2025, up to 100,000 high-voltage batteries will be manufactured there in large-scale production, in particular for the new MAN eTruck suitable for long-distance transport, but also for powering city buses and, in future, coaches.

How many batteries can a man etruck have?

The new M50 building (the topping-out ceremony took place in November 2024) is designed for up to 100,000 batteries per year. The capacity will be expanded depending on the market situation. However, this does not amount to 50,000 electric trucks: MAN's new eTruck can be equipped with up to seven battery packs depending on customer requirements.

Are there any new battery additions?

No new battery additions have been reported. Tim De Chant is a senior climate reporter at TechCrunch. He has written for a wide range of publications, including Wired magazine, the Chicago Tribune, Ars Technica, The Wire China, and NOVA Next, where he was founding editor.
