

255kw photovoltaic inverter

Overview

What is a 125-255kW PV string inverter?

125-255kW three-phase utility-scale 1500 Vdc PV string inverters have 9 MPPT (125K) or 12 independent MPPTs (185 & 255K) with high-rated dc inputs that support "Y" type connection in DC side, up to 30A per DC input . Maximum string input current 15A, support bifacial modules access. Supports anti-PID function to improve system efficiency.

How many MPPTs does a PV string inverter have?

185-255kW three-phase utility-scale 1500 Vdc PV string inverters have 9 MPPT (125K) or 12 independent MPPTs (185 & 255K) with high-rated dc inputs that support "Y" type connection in DC side, up to 30A per DC input . Maximum string input current 15A, support bifacial modules access.

What is a Solis 255kW-ehv inverter?

The 'Solis 255kW-EHV' high voltage (1500V) inverter is designed to maximize PV power plant yields in the new era of high-performance large-area solar panels including bifacial panels, while significantly reducing plant LCOE (Levelized Cost of eElectricity) costs, compared to central inverters.

What is a Sofar 255kV-hv inverter?

The SOFAR 255KTL-HV inverter series is the latest addition of string inverters to SOFARSOLAR's product portfolio. This inverter is made for large ground-mounted 1500 Vdc systems, and supports connecting 800 Vac to the grid.

What are the features of a 3 phase string inverter?

250-255kW three-phase series string inverter have Maximum 28 strings input, support "Y" type connection in DC side. Maximum string input current 15 A, support bifacial modules access. Supports anti-PID function to improve system efficiency. High-precision intelligent strings monitoring reduces fault location time.

Does ginlong Solis have a string inverter?

Ginlong Solis has introduced to the European market its latest utility-scale string inverter.
