

346v 410ah lithium iron phosphate battery pack

Overview

What is a rechargeable lithium iron phosphate battery?

Rechargeable lithium iron phosphate batteries use LiFePO_4 as the principle cathode material. Despite having a lower energy density than other lithium-ion chemistries, lithium iron phosphate batteries can provide better power density and longer life cycles. Emerging Power is your premier lithium battery assembler.

Are lithium iron phosphate batteries better than other lithium ion chemistries?

Despite having a lower energy density than other lithium-ion chemistries, lithium iron phosphate batteries can provide better power density and longer life cycles. Emerging Power is your premier lithium battery assembler. We manufacture custom lithium iron phosphate battery packs and assemblies for many applications.

What are the features of a lithium iron phosphate battery?

Lithium Iron Phosphate (LiFePO_4) batteries from Power Sonic offer advanced features such as advanced battery management systems (BMS), Bluetooth® communication, and active intelligent monitoring. They come in 12.8V and 25.6V ranges with built-in Protection Circuit Module (PCM), delivering high cycle life and exceptional performance across various temperatures.

What is the voltage range of the lithium iron phosphate batteries?

The lithium iron phosphate batteries come in a 12.8V and 25.6V range. They feature advanced battery management systems (BMS), Bluetooth® communication and active intelligent monitoring, delivering a high cycle life and exceptional performance over a wide range of temperatures.

What features do Power Sonic's LiFePO_4 batteries have?

Our line of LiFePO_4 batteries offer a solution to demanding applications that require a lighter weight, longer life, and higher capacity battery. Features

include advanced battery management systems (BMS), Bluetooth® communication and active intelligent monitoring.

Are LiFePO4 batteries better than lead-acid batteries?

LiFePO4 batteries have several clear advantages over lead-acid batteries. A quality LiFePO4 battery can last up to 15,000 cycles, significantly outlasting the 200-500 cycles of a traditional lead-acid battery.

346v 410ah lithium iron phosphate battery pack

Lithium Iron Phosphate Battery Packs: A Comprehensive Overview

Overall, LiFePO4 battery packs are a very efficient and cost-effective energy storage solution with a wide range of advantages. Suitable for a variety of applications, ...

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. Current Inverter Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
