

48v single lithium battery pack

Overview

What is a 48 volt battery pack?

The new maintenance-free, 48-volt, 105Ah single battery pack provides low-speed electric vehicles (LSEVs), such as golf carts, utility vehicles, and delivery vehicles, with several innovations that create extended run times, faster charging, increased torque and speed, safety, ease of installation, and ease of use.

What is a 48 volt battery?

The 48-volt battery means no component upgrades required Trojan Battery Company draws on 100 years of innovation to provide a range of batteries to fit your golf cart and low speed electric vehicle applications.

What is a 48V lead-acid battery?

Many customers and applications have long used 48V lead-acid batteries, so maintaining this naming convention helps with easier understanding and compatibility. Technically, the battery's nominal voltage is 51.2V, reflecting the true voltage output of lithium iron phosphate (LiFePO₄) cells, which operate at 3.2V per cell.

What is a Trojan lithium onepack battery?

EXPERIENCE THE POWER OF ONE. Meet the Trojan Lithium OnePack battery. One battery. From the number one trusted brand in batteries. Packed with a multitude of smart benefits. This is the one battery that charges faster than other batteries. It's the one that runs farther on a single charge. And the one that requires virtually zero maintenance.

What is a 48V LiFePO₄ battery?

Our 51.2V LiFePO₄ battery is commonly called a "48V" battery to align with standard terminology in the industry. Many customers and applications have long used 48V lead-acid batteries, so maintaining this naming convention

helps with easier understanding and compatibility.

How long does a lithium ion battery last?

1 Lithium Ion batteries required. 8-Year Warranty | 4-year full, 4-year prorated. Long lifetime – 10+ years. Fast & opportunity charging. Battery Management System (BMS) protects against short circuits and overheating. Stable lithium iron phosphate chemistry. 4 levels of safety redundancy at the cell level.
