

About the export of photovoltaic modules

Overview

What is the export value of photovoltaic (PV) products from India?

of photovoltaic (PV) products. In Fiscal Year (FY) 2024, Indian PV manufacturers exported approximately U \$2 billion worth of PV modules. The export value of PV modules from India increased by more than 23 times in just two y ars between FY2022 and FY2024.1Several factors have contributed to this rapid increase i.

Which country exports the most PV modules in FY2024?

es higher compared with FY2023. Although India exported more than 29% of its PV module production in FY2024, the majority came from the three largest domestic PV manufacturers – Waaree Energies, Adani Solar and Vikram Solar – each of which exported more than half of its ann.

What data is included in the photovoltaic industry report?

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include volumes in peak kilowatts and average prices.

Can data be published for different types of PV cells & modules?

Data can no longer be published for the specific types of PV cells and modules, or by region. Table changes: Table 1. Not published for 2022. Table 2. Unchanged, includes data from annual and monthly respondents. Table 3. Unchanged, includes data from annual and monthly respondents. Table 4.

How has China shaped the global supply and demand of solar PV?

Government policies in China have shaped the global supply, demand and price of solar PV over the last decade. Chinese industrial policies focusing on solar PV as a strategic sector and on growing domestic demand have enabled economies of scale and supported continuous innovation throughout the

supply chain.
