

Add solar panels to on-site energy

Overview

Can I add solar panels to my existing system?

Adding solar panels to your existing system can be a smart move if you're looking to generate more renewable energy and reduce your electricity bills. But before you get started, you might be wondering.

Is adding new solar panels worth it?

The age of your existing solar system can impact whether adding new panels is worth it: **System Age:** Older systems may not be compatible with newer technology. **Performance:** Consider the current performance and whether it's time for an upgrade rather than an addition.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system. Why add solar panels to an existing solar system?

.

Should I add more solar panels?

Expanding your system requires more than just adding panels, it also means ensuring your project meets local laws and utility requirements. Before you add more panels, check your local building codes to ensure your project is safe and compliant.

Will adding solar panels reduce my energy bills?

Expanding your system can lead to future savings, but it's essential to calculate potential impacts on your energy bills: **Reduced Bills:** Adding additional solar panels can lower your electricity bills by covering more of your home's energy needs. **Cost of Expansion:** Weigh the cost of adding panels

against long-term savings on your energy bills.

Can I install solar panels myself?

It is technically possible to install additional panels yourself, but we don't recommend it. Installing your own solar panel system is dangerous, as with any project involving electrical work. DIY installations also mean you must handle permitting yourself, which can be a lot of time and paperwork.

Add solar panels to on-site energy
