

Albania Residential Energy Storage Project Planning

Overview

What is the situation in the development of the energy sector in Albania?

The situation in the development of the energy sector in Albania 2.1.
Electricity production for 2023 8,796 GWh of electricity, almost 11% more than the energy consumption. increase in production by 25.6% compared to 2022, where it was 7,003 GWh.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

What projects are being developed in Albania?

electricity interconnection lines with neighboring countries, as well as the development of projects new developments in the gasification of the country, which Infrastructure include projects for the construction of LNG terminals and those for connecting Albania with regional gas pipeline networks. 2.-.

Does Albania need a diversified energy production mix?

The government of Albania seems to have already acknowledged the need for a diversified energy production mix. The Minister of Energy and Infrastructure, Belinda Balluku, has repeatedly highlighted that one of the key pillars of focus is the national strategy on energy diversification.

How can Albania solve the energy crisis?

In addition to eliminating the electricity deficit and taking electrification to new sectors, Albania can increase its potential to unlock new industries and investment using clean energy. The country can explore opportunities to produce green hydrogen through solar and wind power.

Is Albania a good place to invest in renewables?

Opportunities for renewables, and especially for solar and wind energy, are extensive in Albania. According to IRENA's Renewables Readiness Assessment report (2021), the solar radiation is very high throughout most of its territory, with the country enjoying some of Europe's highest number of sunshine hours per year.
