Overview

What is the Angola solar project?

The Angola Solar Project creates new opportunities for Angolan communities that will no longer be forced to rely on and pay for gasoline or diesel generators. Each one of the five projects that comprises the Angola Solar Project will supply the needs of 500,000 Angolan homes, mainly in rural areas.

How many MW of solar power will be installed in Angola?

The projects will be installed in the Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje provinces, adding 296 MW of solar capacity and 719 MWh of battery energy storage system to the Angolan grid. The facilities will provide electricity to power one million consumers. Clean energy firm MCA Group has been tasked with the construction of the projects.

Who backed Sun Africa's 370 MW solar PV project in Angola?

Sun Africa was awarded the prestigious "ECA/DFI-backed deal of the year" by "TXF Perfect 10" for Sun Africa's 370 MW solar PV project in Angola. Sun Africa initiated this project, developed it, and arranged long-term financing. At 188.88 MWdc, the Biopio site in Benguela is the largest single solar PV project in Sub-Saharan Africa.

How will Angola's new solar power plant affect the environment?

The solar facility will mitigate the emissions of 224,000 tons of carbon dioxide while providing employment to 600 people. Developed in phases, the facility will be operational for 20 years and falls in line with efforts by Angola to generate 500 MW of renewable energy capacity by 2025.
