

The image displays four black, rectangular Li-ion Polymer batteries for the iPhone 6S Plus, arranged in a fan-like stack. Each battery has a different label:

- Leftmost battery:** Features a 'WARNING' section with three bullet points:
 - Do not store the battery in temperatures exceeding 45°C or 113°F.
 - Do not expose the battery to fire or flame. It may catch fire.
 - Please separate the battery from other combustible materials.
 Below the text are recycling symbols, the CE mark, and the text 'MADE IN CHINA'.
- Second battery from left:** Labeled 'Li-ion Polymer' and 'Model:'. Below this, it says 'Standard Charge for Standard'.
- Third battery from left:** Labeled 'Li-ion Polymer' and 'Model:'. Below this, it says 'Standard Charge for Standard'.
- Rightmost battery:** Labeled 'Li-ion Polymer Battery' and 'Model: iPhone6Splus'. Below this, it lists 'Standard Voltage 3.82V', 'Charge limit voltage 4.35V', and 'Standard: GB31241-2014'. At the bottom is a recycling symbol and the text 'Li-Ion'.

Each battery has a small, flat, rectangular connector tab protruding from its bottom edge.

Overview

Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.
