

Armenia Communication Base Station Wind Power Project Bidding

Overview

How does ADB support Armenia's Wind energy potential?

The Government of Armenia requested support from the Asian Development Bank (ADB) in exploring opportunities to develop Armenia's wind energy potential. ADB responded to the request by preparing the first of two planned phases of technical assistance (TA).

What is the least-cost energy development plan for Armenia?

A least-cost energy development plan for Armenia (2019), sponsored by the United States Agency for International Development (USAID), identifies the development of Armenia's abundant solar and wind potential as the clear least-cost options for new generation capacity.

Will a doubling of electricity capacity improve Armenia's Energy Security & Independence?

In the longer term, a doubling of this capacity appears to be economical and will improve Armenia's energy security and independence. Currently, only 35% of Armenia's total electricity demand is met by indigenous resources (primarily hydroelectric), whereas 65% of electricity generation relies on imported natural gas and nuclear fuel.
