

Asia's leading manufacturer of industrial and commercial photovoltaic panels

Overview

Who is Asian solar?

Asian Solar is one of Southeast Asia's leading Solar Energy Firms. We are involved in design and installation of solar systems, as well as distributing solar panels from manufacturers in Thailand, China, and throughout Asia. Learn more about what we do Asian Solar has experience with diverse types of clients and installation scales.

What makes China's solar panel manufacturing industry unique?

In conclusion, China's solar panel manufacturing industry stands at the forefront of global renewable energy efforts, offering a vast array of high-quality products from leading manufacturers like Primroot.com, Jinko Solar, Trina Solar, and LONGi Green Energy.

Who is the world's largest solar panel manufacturer?

With over 300 GW of solar modules sold to date, JinkoSolar has been the world's largest solar panel manufacturer for five consecutive years, thanks in part to its vertically integrated production capacity, spanning from wafers to modules. Following closely are LONGi Green Energy and JA Solar, ranked second and third respectively.

Why is China the world's leading producer of solar panels?

China is the global powerhouse in solar panel manufacturing, driving the industry with unparalleled production capabilities and cutting-edge technological advancements. As the world's leading producer, China commands over 95% of the global market for key components such as polysilicon, ingots, and wafers, essential for solar panel production.

Where are Suntech Solar panels made?

Suntech is one of the most widespread solar manufacturers that currently exists, having four main branches in Australia, Hong Kong, South Africa, and

the United Arab Emirates, and plenty of business footprints all over the world.

How big is China's solar industry?

The Chinese solar industry is not only vast but also growing rapidly, with projections indicating that the installed solar photovoltaic (PV) capacity in China could reach nearly 2,000 gigawatts by 2029, reflecting a compound annual growth rate (CAGR) of over 26%.
