

Australian small photovoltaic panel manufacturers

Overview

Currently, Tindo Solar and MSquare Energy are the only companies that claim to manufacture solar panels in Australia. Tindo Solar makes its panels at a manufacturing plant in Mawson Lakes, South Australia, and has been in business since 2011. Who makes the best solar panels in Australia?

SunPower Corp. is leading the list of the best solar panel manufacturers in Australia. The company has carved its niche in the Australian soil as well as in the global market with the SunPower® solar technology for unmatched quality and versatility of solar panels.

Are solar panels made in Australia?

If you're chasing Australian-made solar panels, the good news is that you can buy solar panels that are made in Australia – they're just much less common than solar panels that are made in China and sold in the Australian market. Currently, Tindo Solar and MSquare Energy are the only companies that claim to manufacture solar panels in Australia.

What is the current landscape of solar technology manufacturers in Australia?

Let's dive into the current landscape of solar technology manufacturers in Australia. Australia has a rich solar research and development history, but establishing a solid domestic manufacturing sector has proven difficult. Historically, Australian solar manufacturers have faced stiff competition from overseas producers who offer cheaper panels.

Are Australian-made solar panels worth it?

Currently, there are only two Australian-made solar panel brands – Tindo Solar and MSquare Energy. Only 1% of solar panels installed in Australia are designed and manufactured locally. Australian-made solar panels are worth it if you prioritise the brand's location and growth of the local economy over their cost premiums.

How many solar panels are installed in Australia?

Australia's solar sector has witnessed an exemplary upsurge in the past decade. As per the Clean Energy Regulator's data, over 3.5 million solar panel systems were installed across Australia by the end of 2022, with the trajectory set to steadily climb.

How can Australia support local solar production?

Recognising the strategic importance of the domestic solar industry, the Australian government has launched several initiatives to support local production. Tindo Solar is an Australian-owned manufacturer that produces solar panels domestically. Established in 2011, they prioritise high quality by assembling panels with international components.
