

Azerbaijan restricts photovoltaic inverters

Overview

Investors will be required to obtain a permit for the generation of electricity in excess of the limits set by the Cabinet of Ministers of Azerbaijan (i.e., 150 kilowatts).

In order to make effective use of the country's RES potential, the Renewable Energy Law envisages the creation of an Atlas for the RES Potential of the Republic.

The Renewable Energy Law prescribes two methods for selecting investors for the generation of electricity using RES: (i) auctions, and (ii) direct.

The tariffs for electricity to be generated from RES are calculated for each kilowatt-hour of electricity transmitted to the electricity network. Generally, the.
