

Base station communication equipment 8800

Overview

What does the 8800sx do?

The 8800SX provides analysis of the HDQPSK downlink and HCPM uplink modulation formats used in the Phase 2 standard. The 8800SX includes a cost effective way to measure the critical parameters for field-testing of TETRA base stations.

What is a 8800sx radio?

The 8800SX is designed for complete automated radio test and alignment for analog and digital radios. Using the accurate instrumentation and high-speed remote command architecture, the 8800SX optimizes radio performance in minutes; with minimal human interaction.

What is zxsdrr bs8800 LMT?

LMT (Local Maintenance Terminal), as is shown in Figure 21 ZXSDR BS8800 LMT M I G U R E LMT completes operations such as scaling, power query and power adjustment of ZXSDR BS8800 . Confidential and Proprietary Information of ZTE CORPORATION.

Does the 8800sx have a wideband power sensor?

An alternate configuration of the 8800SX (Part Number 139942) comes with the wideband power sensor built-in so this valuable tool will not be forgotten. In addition to the full suite of field-level test instrumentation, the 8800SX features a 50 MHz Wideband Analyzer with six color markers.

What is zxsdrr bs8800 board configuration?

Board Configuration ZXSDR BS8800 consists of baseband subrack and RF subrack. Baseband subrack is equipped with CC, CH, FS, SA, PM and FA boards while RF subrack with RSUs. Table 11 lists the description of ZXSDR BS8800 board configuration. Page 37 Compulsory 1, 2 At least one PM is configured.

Can I use an external wideband power sensor with 8800opt13?

The base configuration of the 8800SX (Part Number 142820) supports the use of an external wideband power sensor with 8800OPT13. An alternate configuration of the 8800SX (Part Number 139942) comes with the wideband power sensor built-in so this valuable tool will not be forgotten.
