

Bifacial double-glass module parameters

Overview

What are bifacial and monofacial modules output parameters?

For both, bifacial and monofacial modules, the important system output parameter is the yield of electricity (in kWh per year).

What are ja bifacial modules?

JA bifacial modules are assembled by high-performance PERC technology, encapsulated by glass-glass panels, are capable of converting energy from lights on front and diffuse light, as well as reflected and scattered light on which make them better reliability, superior low irradiance performance, excellent energy generation performance.

How long does a glass-glass bifacial module last?

Besides, glass-glass bifacial modules could provide a minimum of 30 years thanks to the better resistance to corrosion, abrasion, extreme weather, shock, and vibration that ensures N-type module safety during production, transport, installation and long-term power generation and prevents new invisible cell cracking.

How are bifacial solar cells encapsulated?

Bifacial solar cells can be encapsulated in modules with either a glass/glass or a glass/ transparent backsheet structure.

Why are n-type bifacial modules so popular?

Interest in N-type bifacial modules has rapidly increased due to their ability to generate more power than conventional P-type bifacial thanks to their higher bifacial factor, lower degradation, lower temperature coefficient in addition more energy density and power class.

Which bifacial factor is better n-type Topcon solar cells?

The reflectance and transmittance of n-type modules with glass/glass structures can maximize the higher bifacial Factor advantage of n-type TOPCon cell, providing approximately 10W more, as compared with glass/transparent backsheet modules using the same n-type TOPCon bifacial solar cells.

Bifacial double-glass module parameters

The Glass-glass Module Using n-type Bifacial Solar Cell with ...

Introduction The glass-glass module is featured by better reliability, lower PID and better mechanical strength. Thus, it is suitable for extreme environments, such as high ...
