

Bolivia mobile power station electricity price

Overview

Electricity tariffs in Bolivia are far lower than average tariffs in Latin America. The average residential tariff in 2006 was US\$0.0614 per kWh (compared to US\$0.115 per kWh in), while the average tariff for the industry was US\$0.044 per kWh (compared to US\$0.107 per kWh in LAC). Electricity prices charged by the distribution companies to their regulated clients include energy.

What is the electricity system in Bolivia?

Like in other countries, Bolivia's electricity sector consists of a National Interconnected System (SIN) and off-grid systems (known as the Aislado). The national government's priorities for the electricity sector include providing universal access to electricity and producing surplus energy for export.

How much does electricity cost in Bolivia?

Electricity tariffs in Bolivia are far lower than average tariffs in Latin America. The average residential tariff in 2006 was US\$0.0614 per kWh (compared to US\$0.115 per kWh weighted average in LAC), while the average tariff for the industry was US\$0.044 per kWh (compared to US\$0.107 per kWh weighted average in LAC).

When did electricity start in Bolivia?

Electricity in Bolivia started in 1899, when tin magnate Simón Iturri Patiño built a Diesel-generated power plant in Uncía, which provided energy to his nearby residence and the Miraflores mine. The first hydroelectric power plant was built in 1902 in Landara.

Is Bolivia a good place to get electricity?

In 2005, total access to electricity in Bolivia was 67%, one of the lowest in Latin America. Urban access was 87%, while rural access remained as low as 30%. (See Recent Developments for more information on electrification plans) Service quality as measured by interruptions was much better than the LAC average in 2005.

How many people will benefit from the electricity subsidy in Bolivia?

This subsidy, which will be covered for four years by the electricity companies that operate in Bolivia, will benefit about 480,000 households. In the years following the privatization of 1994, investment grew considerably due to the obligations imposed on the privatized companies.

How much power will Bolivia have in 2025?

The government envisions a major expansion of electricity generation capacity to over 8,000 MW over the decade from 2015 to 2025, primarily to export surplus generating capacity. In Bolivia, the National Interconnected System (SIN) connects major population centers and represents 83% of the installed capacity.
