

Cabinet type 220v inverter

Overview

Which frequency inverters are suitable for control cabinets?

We have developed the NORDAC PRO family of frequency inverters especially for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all conceivable customer requirements thanks to a wide range of options.

What is i550 cabinet frequency inverter?

The i550 cabinet frequency inverter is a compact control cabinet device with scalable functionality. It is versatile, reliable, and easy to use. The requirements of the Ecodesign Directive, Standard EN IEC 61800-9-2, are met.

How much power does a control cabinet inverter have?

Our inverters for control cabinet installation have a power range from 0.25 to 160 kW and can be extended with optional plug-in modules. Variable cooling concepts ensure optimum heat dissipation. Why Inverters for control cabinet installation from NORD?

.

What types of inverter modules are available?

The inverter modules are available for various input and output voltages, and the output power varies according to the voltage combination. INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture.

What is a rectifier / inverter system cabinet?

Rectifier / inverter system cabinet of reduced height, populated with inverter modules, "EUE" electronic bypass switch and manual bypass, together with

rectifier modules. You get the most economical solution and benefit in the long term from the direct link to BENNING as the manufacturer.

How do I switch the load to the inverter output?

There is the option of switching the load to the bypass mains or to the inverter output, thanks to the manual bypass which is also housed in a 1/5, 19" rack module. System cabinets are available in a range of different sizes, coming with the required number of racks for inverters and for rectifiers.
