

Can France do industrial energy storage

Overview

Does France have a natural gas storage facility?

France has a number of commercial natural gas storage facilities located across the country. There is no public or strategic natural gas storage in France and underground natural gas storage facilities are an essential tool for allowing operators to balance their systems and optimise their gas use.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

What is the energy storage industry?

Energy Storage forms part of the Energy industry, which is the 15th most popular industry and market group. If you're interested in the Energy market, also check out the top Energy & Cleantech, Renewable Energy, Oil & Gas, Recycling or Energy Efficiency companies. All-in-one AI-powered energy solution for reliable operations
