

Can lithium battery packs be exported

Overview

□ If the product is certified as general cargo (e.g., low power, installed in device, compliant packaging), it can be exported as non-DG. □ If certified under UN3480 / UN3481 / UN3171, it must follow dangerous goods export regulations. Can lithium-ion batteries be shipped around the world?

Lithium-ion batteries can be shipped around the world; however, some transportation methods will have different rules. For example, the IATA and ICAO have specific rules for shipping lithium-ion batteries by air. There have been incidents of batteries causing fires within the aircraft and forcing emergency landings.

Are lithium-ion batteries safe to ship?

Things to consider when shipping lithium-ion batteries Because lithium-ion batteries are typically contained or encased within the equipment or products they power, smartphones, tablets, and laptops, they are considered safe to transport, as long as the metal or alloy cell in the battery does not exceed 1g.

Can You ship lithium ion batteries by air?

For example, the IATA and ICAO have specific rules for shipping lithium-ion batteries by air. There have been incidents of batteries causing fires within the aircraft and forcing emergency landings. Batteries are not allowed in unaccompanied luggage by air freight.

Why is shipping lithium-ion batteries important?

From smartphones, tablets, drones, and remote controls to powering electric vehicles, shipping lithium-ion batteries is becoming more and more important. As lithium batteries are classed as dangerous goods, their transportation needs to be well monitored to ensure safety and minimize potential risks during transportation.

How do you ship lithium ion batteries?

Goods must be labelled as “Lithium Ion Battery” or “Lithium Metal Battery” and include appropriate shipping marks and hazard labels. Lithium batteries must have the correct documentation – including a Dangerous goods declaration, air waybill, and packing list. Can you Ship Lithium-ion Batteries Internationally?

.

How do I reduce the risk when shipping lithium batteries?

There are several steps that should be taken in order to reduce the risk when shipping lithium batteries, including: Only transporting batteries that have been verified as meeting industry standards and testing requirements. Ensure batteries are only partially charged (approximately 30-50%).

Can lithium battery packs be exported
