

Can solar energy be placed on tiles

Overview

So, can you install solar panels on a tile roof?

The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. Can you install solar panels on tile roofs?

Short Answer: Yes, you can install solar panels on tile roofs, but the process requires specialized knowledge and equipment to ensure proper installation and avoid damage to the roof. Installing solar panels on tile roofs is not only possible but can be highly effective.

Does the type of roof tiles affect solar panels?

The type of base roof tiles on your home can affect the durability and functionality of solar panels. Installing solar panels over high-quality roofing materials like Brava Roof Tile products can prevent issues from occurring.

Can solar panels be installed on lightweight tiles?

If installers attempt to mount solar panels directly onto lightweight tiles, several issues can arise: Tile breakage: Walking on or drilling through these tiles can cause cracks or breaks, which may lead to roof leaks and structural damage.

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation, also known as a “comp-out” installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

Can I go solar on a clay tile roof?

Some companies may tell you that you can’t go solar or that they won’t do the

install, but that is not the case. Installing solar on a clay tile roof is often done with a comp-out, which where your installer will remove the tiles where you intend to put solar, then lay down composite shingle to install the array.

How do you install solar panels on a new roof?

Mounting the solar panels – Once the new roof section is complete, a solar expert installs the racking system and solar panels securely onto the composite shingles. Unlike tile, these shingles can handle the weight and pressure of solar mounting without breaking.
