

Canadian medical equipment lithium battery pack

Overview

Excell Battery has become a trusted partner for Thornhill Medical and its integrated, portable life support system by supporting a rapid ramp-up in production during the global pandemic and lever.

What makes Canada a good place for lithium ion batteries?

Toronto's commitment to sustainable development is evident in its support for lithium ion battery production, fostering a network of suppliers and manufacturers that are integral to the national supply chain of lithium batteries. Vancouver is another significant center for the lithium battery industry in Canada.

Why do medical devices need a battery pack?

Devices such as; defibrillators, surgical instruments and portable diagnostic equipment all rely on battery packs made to ISO 13485 standards to guarantee safety and effectiveness. Partner with Alexander Battery Technologies for reliable, custom battery solutions that meet the unique needs of your medical equipment or device.

What medical devices use lithium batteries?

Portable Medical Devices: Many portable medical devices like blood glucose meters, infusion pumps, portable oxygen concentrators, and electronic thermometers use lithium batteries. The lightweight nature of lithium batteries makes these devices more compact and easily portable for patients who need continuous monitoring or treatment.

Who makes medical equipment batteries?

NPP designs and manufactures implantable & portable Lithium Medical Equipment batteries for medical uses with the highest quality standards and 20 years of experience.

What is battery-powered hospital equipment?

Battery-powered hospital equipment encompasses a wide range of devices

crucial for patient care and medical procedures. These devices rely on the reliability and safety of battery systems to ensure uninterrupted operation, especially in critical situations.

Is Canada a leader in the lithium battery industry?

In the ever-evolving landscape of energy solutions, Canada has emerged as a significant player in the lithium battery industry. By 2024, Canadian lithium battery manufacturers are not only enhancing their production capabilities but also contributing to the global push towards renewable energy and electric mobility.
