

Chilean photovoltaic panel source manufacturer

Overview

What is CVE's vision for solar energy in Chile?

In 2023, the deployment of photovoltaic parks reached 8.5 GW. The country is committed to increasing installed solar capacity to 22 GW by 2029. CVE's strategy is based on the production of decentralized renewable energies sold through short distribution channels. Chile is a key market for realizing this vision.

Does Chile have solar power?

Chile has exceptional solar potential and a favorable regulatory framework. In 2023, the deployment of photovoltaic parks reached 8.5 GW. The country is committed to increasing installed solar capacity to 22 GW by 2029. CVE's strategy is based on the production of decentralized renewable energies sold through short distribution channels.

What is CVE Chile's battery storage technology?

CVE Chile has launched into battery storage technology. This development aims to optimize the use of photovoltaic production by shifting the electricity generated during the day to peak periods in the evening. This strategy is a response to our customers' fluctuating energy needs.
