

China-Europe Mobile Energy Storage Power Supply

Overview

What is China's energy storage capacity?

China has total energy storage capacity of about 35 GW as of 2020, of which only 3.3 GW was new energy storage, according to the China Energy Storage Alliance.

What are the leading energy storage battery companies in China?

Leading energy storage battery companies in China include BYD (002594.SZ), which is also the country's biggest electric vehicle maker, and CATL (300750.SZ).

How much will China's ESG plan stimulate investment?

The plan, released by the state planner, National Development and Reform Commission, and the energy regulator, said the target will stimulate 250 billion yuan (\$35 billion) in investment in the sector. Make sense of the latest ESG trends affecting companies and governments with the Reuters Sustainable Switch newsletter. Sign up [here](#).

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems, but not pumped hydro, which uses water stored behind dams to generate electricity when needed. Our Standards: The Thomson Reuters Trust Principles.
