

Colorful Solar Photovoltaic

Overview

Are coloured solar panels a good choice?

And our coloured solar panels can significantly prevent those emissions. In addition to colourful solar panels, Solarix offers various variants of white, black and grey-tinted solar panels. White is a highly sought-after colour for facade panels in building design, because it gives a fresh and bright appearance.

Are colorful photovoltaic panels a good idea?

Colorful photovoltaic panels are no longer a novelty. Already for years on the market circulate red, brown and even green photovoltaic modules that can camouflage their appearance and improve the integration of solar in the building. Trying to balance performance with a greater focus on aesthetics. But how valid are these solutions?

.

What color solar panels are available?

Silk® Colour is available in four coloured versions: Red, Orange, Green & Silver with up to 390 Wp power and the colour of the frame can be customized too! Discover FuturaSun's best selling series of monocrystalline colored solar panels Silk® Colour! Available in Red, Orange, Green and Silver. Contact us now!.

What makes Solarix coloured solar panels unique?

Using a unique technique, Solarix produces coloured solar panels with a deep colour experience in combination with high-energy generation. The innovations in high-quality ceramic colour techniques in the Solarix colours ensure that the solar panels match perfectly with other materials in construction, such as stone, composite, wood and aluminium.

Are colored solar panels gaining popularity?

However, you may have noticed that some solar panels have a more sleek black appearance; they are becoming increasingly frequent in recent installations. While the great majority of solar panels are black or extremely dark blue (and sometimes dark green), you may be surprised to find that colored solar panels are gaining popularity.

Is black a good colour for solar panels?

Black is also a colour that should not be ignored when developing aesthetic solar facades. In the black collection we use low-visibility cell technology in combination with different types of glass that give the solar panels different looks such as glossy, matte and structured.
