Overview

How much does a 5G base station cost?

[Click Here To Download It For Free!](#) Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

How much does a 5G network cost?

Here's a look at the main costs involved: The core network is the backbone of your private 5G setup. Investing in core network equipment can cost around \$300,000 initially, with annual licensing fees that may reach \$100,000. However, as the market grows, these costs are expected to decrease, making it more affordable for enterprises.

How much does a 5G non-standalone Evolved Packet Core cost?

Have you ever wondered how much a 5G non-standalone Evolved Packet Core for up to 50,000 subscribers costs, including the installation and everything?

Sure you have. It will run you anywhere from \$250,000 to \$1.2 million, depending on the vendor. Or what about the software license fee, per subscriber, for a 4G Internet of Things system?

.

How much does a 5G small cell cost?

The 5G small cell cost ranges from \$10,000 to \$50,000 per site. Small cells are a crucial part of 5G networks, especially in cities where high data demand exists. Each small cell costs between \$10,000 and \$50,000 to deploy, depending on location and infrastructure requirements.

How much does a private 5G deployment cost?

Initial costs can be around \$100,000. Backhaul connectivity, which links the core network to the internet, can also be a significant expense, often costing \$30,000 to \$80,000. Understanding these costs is essential for budgeting and planning your private 5G deployment effectively.
