

Communication Engineering Base Station Equipment

Overview

A base transceiver station (BTS) or a baseband unit (BBU) is a piece of equipment that facilitates between (UE) and a network. UEs are devices like (handsets), phones, computers with connectivity, or antennas mounted on buildings or telecommunication towers. The network can be that of any of the wireless communication technologies like , , , or other

Communication Engineering Base Station Equipment

Cellular Base Stations

As you drive along the highway, you may notice cellular towers or cellular base stations appearing every few miles. A base station is the ...
