

Communication base station EMS size ranking

Overview

What is the global base station antenna market size?

The global base station antenna market size was valued at USD 8.19 billion in 2022 and is projected to grow from USD 9.36 billion in 2023 to USD 28.15 billion by 2030, exhibiting a CAGR of 17.0% during the forecast period.

Why is the network of a base station important?

The network of the base station is essential for the transmission of wireless connections. The antennas deployed at the base station transmit and receive radio waves as radio frequency from the connected devices to the base station. To establish a wireless connection for communication, these radio waves are very important.

What is the fastest growing segment in 5G base station market?

The 5G macro cell segment is emerging as the fastest-growing segment in the 5G base station market, projected to grow at approximately 40% during the forecast period 2024-2029.

How big is the 5G base station market?

The 5G Base Station Market is expected to reach USD 37.44 billion in 2025 and grow at a CAGR of 28.67% to reach USD 132.06 billion by 2030. Huawei Technologies Co., Ltd., ZTE Corporation, Nokia Corporation, CommScope Holding Company, Inc. and QUALCOMM Incorporated are the major companies operating in this market.

Does Ericsson have a 5G base station?

Through this partnership, Ericsson aims to deploy manhole-shaped 5G base stations and supply sub-terrain antennas. March 2023 – Radio Frequency Systems collaborated with Nokia to launch a new antenna platform to support 5G network. The antenna is built in a compact design to 5G base station capabilities.

What is the future of base station technology?

The industry is seeing innovations in both small cell and macro cell technologies, with vendors focusing on developing more efficient, compact, and powerful base station solutions that can support various deployment scenarios from dense urban areas to rural locations.
