

Communication base station inverters were arrested

Overview

Are there Rogue communications devices in solar power inverters?

Still, experts who strip down devices hooked to grids to look for possible security issues have found some rogue communications devices not listed in product documentation in solar power inverters. Those devices were manufactured in China.

Did China install rogue communication devices in US solar inverters?

The president looks pretty smart after a report of China installing rogue communication devices within solar inverters sent to the US. Reuters reports that US officials are again examining the risk posed by devices manufactured in China, especially those that play a vital part in US infrastructure.

Are China's inverters a threat to US infrastructure?

Reuters reports that US officials are again examining the risk posed by devices manufactured in China, especially those that play a vital part in US infrastructure. This comes after communication equipment was found inside some inverters, which are used to connect solar panels and wind turbines to the grid.

Could remote inverters destabilize power grids?

Energy security experts warn that coordinated remote manipulation of these devices could destabilize power grids and trigger widespread blackouts, particularly as Chinese-made inverters now control a substantial portion of renewable energy capacity in the United States and Europe.

Could Chinese power inverters be rogue?

The Times reported that experts found rogue devices, including hidden cellular radios, in Chinese-made power inverters used worldwide, including the UK. These devices could be remotely activated to shut off inverters, potentially causing widespread power disruptions.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.
