

Congo Kinshasa is an outdoor power supply manufacturer

Overview

The company focuses on 4 areas: 1. Electrical infrastructure for industries. Congo Energy designs, produces and installs bespoke infrastructure. The company is proficient in the latest innovations in t.

Who is Congo energy?

Exclusive distributor of PRAMAC products in the DRC, Congo Energy offers a wide range of reliable and efficient generator sets. Our energy solutions cover various sectors, from light industry to specific infrastructures such as health and data centers. Thanks to our expertise, we offer tailor-made solutions and efficient after-sales service.

What are the power plug sockets in Congo-Kinshasa?

In Congo-Kinshasa, the power plug sockets are of types C, D, and E. When living in the United States of America, you need a power plug adapter for sockets of types C, D, and E.

What certificate does Congo energy have?

Congo Energy has the certificate issued by ARSP (Autorité de Régulation de la sous-traitance dans le secteur privé). This certificate certifies that Congo Energy is authorized to work as a subcontractor in the Democratic Republic of Congo. Congo Energy strives to provide its partners and customers with high-quality products and services.

Why should you choose Congo energy?

Thanks to our expertise, we offer tailor-made solutions and efficient after-sales service. Congo Energy has the certificate issued by ARSP (Autorité de Régulation de la sous-traitance dans le secteur privé). This certificate certifies that Congo Energy is authorized to work as a subcontractor in the Democratic Republic of Congo.

What is the standard voltage in Congo-Kinshasa?

In Congo-Kinshasa, the standard voltage is 220 V. You will need a voltage

converter to use your electric appliances there, because the standard voltage in Congo-Kinshasa is higher (220 V) than in the United States (120 V). Using your appliances without a converter could cause damage.

What percentage of Congolese people have access to electricity?

Less than 10% of the Congolese population has access to electricity, 35% in urban areas (50% in Kinshasa) and less than 1% in rural areas. There are also strong regional disparities in access to electricity. But, Congo has an immense development potential thanks to abundant hydrological and solar resources.
