

# **Cook Islands Communication Wind Power Base Station Supplier**

## Overview

---

Will the Cook Islands have a wind energy project?

The proposed wind energy project in the Cook Islands, assuming the wind resource proves to be viable and the project performs as expected, will have a high international profile and, as indicated in the UNDP/UNESCO report, will be designed for ease of replication by other island countries in the Pacific and elsewhere.

Is a grid-connected wind energy project feasible for Rarotonga?

A grid-connected wind energy project for Rarotonga in the 2 MW class is technically feasible and financially and economically sound at current fuel price levels. A conservative base case calculation of the projects Economic Internal rate of return shows a value of 4.4 %.

What fuels are used in the Cook Islands?

The Cook Islands energy sector relies 100 % on imported fuels for transport, electricity generation and household use. Imports were 23 million litres in 2004 of which diesel accounted for the lions share of 12 million litres, gasoline 5 million and multipurpose kerosene 7 million.

Which documents are based on a project proposal for grid-connected wind power?

This report is based on two documents: The Project Proposal for Grid Connected Wind Power on Rarotonga presented by UNDP Samoa in March 2002 and the Evaluation of Grid-Connected Wind Electric Power Project Proposals for Rarotonga, Cook Islands, by Chris Cheatham and Gerhard Zieroth commissioned by UNESCAP Bangkok, August 2002.
