

Cost of 2 kilowatt solar panels

Overview

A 2 kilowatt (kW) solar panel system can help power your home while significantly reducing monthly utility costs. In 2025, a 2 kW solar panel system costs around \$6,360 before incentives. How much does a 2 kilowatt solar system cost?

A 2 kilowatt (kW) solar system will typically cost between \$3,000 and \$4,500 after the solar rebate, depending on the efficiency of the solar panels. The number of solar panels required to generate 2 kW of energy will vary depending on the efficiency of the panels.

How much electricity does a 2 kW solar system use?

The cost of electricity where you live is the most significant determinant of your solar savings. The table below shows average estimated electricity production numbers for 2 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

Can a 2KW solar system save you money?

Investing in a 2kW solar system can lead to significant savings on electricity bills. On average, this system can save up to \$621 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to \$15,513. It is important to consider the rising cost of electricity when evaluating the potential savings of a 2kW solar system.

How many panels does a 2KW Solar System need?

Considering that each panel has a size of 17 sqft, and you will need 7 panels for a 2kW system, the total footprint will be 113 sqft. How Many kWh Does a 2kW Solar System Produce?
