

Croatia base station power supply

Overview

How is electricity supplied in Croatia?

Customers in Croatia are supplied with electricity from power plants in Croatia, from power plants built in neighboring countries for Croatia's needs and with electricity procured from abroad. By its size, the Croatian power system is one of the smallest power systems in Europe.

What is a Croatian power system?

The Croatian power system comprises plants and facilities for electricity production, transmission and distribution in the territory of the Republic of Croatia.

Do I need a power adapter in Croatia?

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Croatia, you will need a power adapter and/or a voltage converter/transformer. The standard voltage in Croatia is 230 V, and the standard frequency is 50 Hz.

What type of electrical outlet does Croatia use?

Croatia uses type F ("Schuko" sockets) electrical outlets, also known as European plugs. Type F electrical outlets are round, with two round shaped pinholes and some have a grounding pin at the bottom. Type F sockets are the most common in Europe and can be found in many other countries as well.

What voltage does Croatia use?

Croatia uses outlet type C and F at a voltage of 230V and a frequency of 50 Hz. Plug Compatibility: Type C, Type F Voltage: 230V Frequency: 50 Hz Can North Americans use Electronics in Croatia without an Adapter?

No! North Americans will need an adapter for the outlets and a transformer

for the voltage when traveling to Croatia.

What plugs are used in Croatia?

We've got you covered with this comprehensive guide on electricity in Croatia to ensure all of your electronic devices stay fully charged and functional during your stay. Plugs for Croatia are: Type C: also known as the Europlug, is a two-pin plug commonly used in most European countries, as well as in parts of Asia and Africa.
