

Croatian lithium titanate battery pack

Overview

What is a lithium titanate LTO battery pack?

2.4V~11V Lithium Titanate LTO Battery Packs are designed for emergency lights products and other portable devices. 12V Lithium Titanate LTO Battery Packs are designed for solar street lights and other energy storage. 24V Lithium Titanate LTO Battery Packs are designed for UPS. 36V Lithium Titanate LTO Battery Packs are designed for e-bike and UPS.

Is lithium titanate battery (LTO) safe?

Our Lithium titanate battery (LTO) packs manufactured according to the requirements of UN38.3, MSDS, CE, CB, RoHS, IEC62133 certifications. And all lithium titanate battery (LTO) undergo the rigorous safe tests (overcharge/over-discharge test, short-circuit test, high temperature test and low-voltage test) in our research laboratory.

How long does a lithium ion battery last?

Ultra-fast charging: Capable of fully charging in as little as 10 minutes due to high lithium-ion diffusion in the titanate anode. Exceptional cycle life: Can endure upwards of 15,000 to 20,000 charge cycles with minimal capacity loss, far surpassing other lithium-ion batteries.

Why are LTO batteries so expensive?

Lower energy density: Typically about 60-70 Wh/kg versus 150-200 Wh/kg for standard Li-ion, meaning heavier and larger battery packs for the same energy. Higher cost: Due to expensive raw materials and complex manufacturing processes, LTO batteries can cost 3-5 times more than other lithium-ion variants.

Are LTO batteries better than lithium ion batteries?

Compared to graphite-anode lithium-ion batteries (like Li-NMC or LiFePO₄), LTO batteries trade lower energy density (about 60-70% that of Li-ion) for

significantly enhanced cycle life, safety, and charge speed.

Are LTO batteries safe?

LTO batteries demonstrate superior safety margins by resisting thermal runaway and reducing risk of fires and explosions, even under extreme mechanical or electrical abuse. Their stable chemistry and robust structure minimize hazardous failures common to other lithium-ion batteries.
