

Cuba s mobile photovoltaic solar panels

Overview

How many photovoltaic solar parks are there in Cuba?

Cuba began the construction of 59 photovoltaic solar parks with the idea of reducing dependence on fossil fuels and creating other wastelands in which clean energy is the main resource for electricity consumption. Of these 59 solar parks, it is expected that: 33 are completed within the current year, synchronizing with the national energy system.

How many solar panels are there in Cuba?

This greatly underdeveloped energy source is slowly making its way across the island: there are currently more than 6,000 photovoltaic panels and 1,500 solar heaters in use. The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity.

What is a solar park plan in Cuba?

The objective of the solar park plan in Cuba is the construction of a total of 92 photovoltaic installations which, according to the official schedule, should be completed before 2028. Each of these parks would have a capacity of 21,87 MW, which would allow for an estimated total generation of around 3.400 gigawatts/hour per year.

Cuba s mobile photovoltaic solar panels

Cuba tackles energy crisis by promoting power of the sun

In the short term, the investment project consists of installing 1,000 MW of solar photovoltaic energy by 2025, distributed across 46 solar parks throughout the country.
