

Customized portable power supply

Overview

Do I need a custom power supply?

Unfortunately, most audio products (DACs, amplifiers, servers) will require a custom solution. In essence, a better power supply will sonically “align” the complex analog and digital signal into something that’s properly outlined and shaped. This alignment is responsible for the tighter lines and an overall more insightful listening experience.

What products does custom power offer?

Custom Power offers a comprehensive range of products and custom designs for lithium-ion, lithium polymer, primary lithium, nickel-metal hydride (NiMH), nickel-cadmium (NiCd) and alkaline batteries. Explore some of the specific product types we supply.

What is a portable power supply?

A portable power supply is a device that can store and provide electrical energy for various purposes. It can power small appliances, charge electronic devices, or supply emergency backup power in case of a blackout. Portable power supplies are usually rechargeable and have different capacities and features depending on the intended use.

What is a portable power station & a home energy storage battery?

Product portfolio includes portable power stations (300W-2000W) for on-the-go applications and home energy storage batteries (5kWh-30kWh) for residential use, providing solutions that scale with your customers’ diverse energy needs. Perfect for field work, outdoor events, and mobile operations. Home energy independence and backup power solutions.
