

DC distribution cabinet for communication base station

**51.2V
200Ah/300Ah
LiFePO4 battery**

Overview

What is dcdu-12b?

DCDU-12B provides stable power distribution for the TDS-LTE Base Station System. It is the DC distribution unit or device. It serves for distributing the DC power needed for different power needed devices like RRU, EMUB, BBU, and many more.

What is a DST Telecom rackmount DC distribution panel?

The DST is a high density Telecom Rackmount DC Distribution Panel designed to accommodate virtually any 48V, 24V or 12V DC power distribution requirement. Its flexibility makes it ideal for all telecom site DC power requirements, large and small.

What is a high-density mini-sized DC power solution?

High-density mini-sized DC power solutions for outside plant enclosure, central office or embedded applications. The NetSure 2100 Series, a compact -48 volt, 48 amp DC power shelf, features an advanced control unit, up to (3) positions for 1000W high-efficiency eSure rectifiers and space for distribution breakers and fuses.

What products can be used with a DC power system?

Batteries and more for DC power systems. Products frequently used together with DC power systems are available, including battery disconnects, batteries, battery strands, battery trays, bus covers, assorted panels, circuit breakers and much more.

How many ports does a dcdu-12b have?

It consists of two input terminal blocks and 10 different ports for output. Each port or certain port is assigned for its maximum output fuse current. DCDU-12B provides stable power distribution for the TDS-LTE Base Station System.

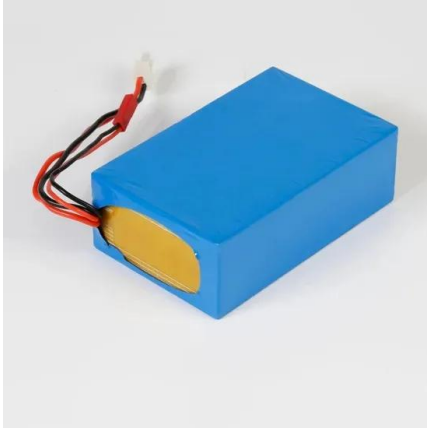

How many circuit breakers can a distribution panel accommodate?

Its flexibility makes it ideal for all telecom site DC power requirements, large and small. These distribution panels accommodate up to 10 or 20 circuit breakers (depending on model) within a compact rackmount housing, occupying only 2 RU of rack space.

DC distribution cabinet for communication base station

[Outdoor Communication Single Warehouse Cabinet](#)

It provides uninterrupted power supply (UPS) capabilities, ensuring reliable power for critical applications such as communication base stations and emergency services in regions with ...
