

# DC group series inverter

## Overview

---

Who is DC group?

Uninterruptible Power Supply Company. Unstoppable Innovation. Welcome to DC Group, your partner in uninterruptible power supply (UPS) solutions tailored specifically for the most demanding businesses including data centers across North America and Europe. Your Data Center. Our Mission.

Which Inverter should I Choose?

Whatever your inverter need, it can be met by the M system. M is optimized for PV and for BESS. It's built in the USA with silicone carbide technology and boasts >99% efficiency. Smaller, faster, and cheaper, M is optimized for solar. It has no liquid cooling, higher efficiency, and smaller building blocks which future-proof the design.

How many series DC-DC converters does ERG offer?

ERG offers seven Series of DC-DC converters, the output power determining the package series and size – E400, E500, E700, E800, E900, E1200 and E1600 – in a wide range of input voltages. For example, ERG's E712-5.06U is a 700 Series DC-DC converter that converts a 12 VDC input voltage to 500 VDC@6mA, unregulated.

What is a DC-DC converter?

ERG stocks DC-DC converters in a range of output power levels from 0.25 W to 25 W for performing simple voltage conversions at low power. Our DC-DC converters provide simple and inexpensive solutions if you need a certain output voltage that is not already in your system and need to convert one voltage to another.

Why is m a good choice for a central inverter?

M provides the most flexibility in the industry for central inverters, built-in spare capabilities, lower install costs, lower shipping costs, and infinite

production capacity.
