

Daily price of wind

Overview

Wind Energy Index rose to 18.80 USD on September 8, 2025, up 0.64% from the previous day. How much does wind energy cost?

In low wind areas, the costs are significantly higher, at around 8-11 c€/kWh, while the production costs range between 5 and 7 c€/kWh in coastal areas.

What is the wind cost dashboard?

This dashboard provides an overview on the latest wind costs. An unexpected error occurred. If you continue to receive this error please contact your Tableau Server Administrator.

How do you calculate the cost of a wind turbine?

The total cost per kWh produced (unit cost) is calculated by discounting and levelising investment and O&M costs over the lifetime of the turbine, and then dividing them by the annual electricity production. The unit cost of generation is thus calculated as an average cost over the turbine's lifetime.
