

Danish Group Energy Storage Battery

Overview

Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 – European Energy has started on its first large-scale battery storage project.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

Why should European Energy Invest in battery storage?

With the installation of a state-of-the-art battery, European Energy is positioned to enhance the stability and resilience of the electricity grid. "Battery storage is a key component in the development of future energy projects.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

Are lithium ion batteries a viable energy storage solution?

Batteries, in particular lithium ion batteries, are among the most well-known and economically feasible technologies for energy storage. As of today it is the only realistic solution for batteries in electric cars, mobile phones and similar

mobile devices. But there is a downside.

Will battery storage be the most competitive option in the future?

Recently, International Energy Agency (IEA) estimated in an analysis that battery storage will become the most competitive option for flexibility in the future power system - due to cost reduction on batteries. The academic, utility and industrial partners in the BOSS Project share this view.
