

Dedicated power generation for cold chain containers

Test certification
CE  FC 

Overview

A genset, or generator set, is a compact, self-contained power unit used to operate refrigerated containers-commonly called reefers-when no external electricity is available. These diesel-driven machines supply the energy needed to keep the container's cooling system running throughout the journey.

Dedicated power generation for cold chain containers

Highvoltage Battery

Tandem PowerPack

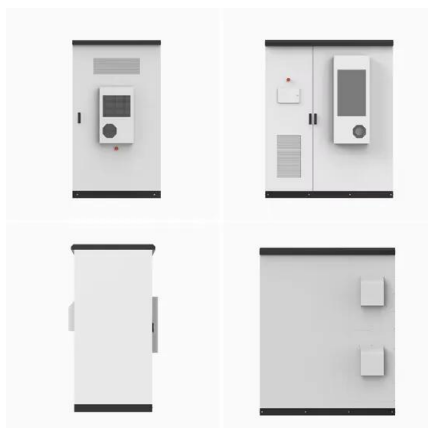

The Tandem PowerPack is a modular pack that enables zero emissions cold chain operations with existing tractors, trucks, chassis, and trailers. Use the PowerPack without range anxiety, ...
