

Demand for solar panels

Overview

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

Will new solar PV panels increase demand over the forecast period?

The launch of new solar PV panel products in residential applications is expected to increase product demand over the forecast period. In December 2022, Soloes launched next-generation solar panels, ANTARES BI 144, with high radiation capacity and proof against negative effects from sunlight.

What drives the solar panel market growth?

The solar panel market growth is driven by the way the world is progressing towards the use of renewable energy, strong government decarbonization strategies, and mounting innovation in solar panel cost and efficiency.

What is the global solar panel market size?

Get a personalised briefing?

Have Questions?

The global Solar Panel Market size is expected to reach USD 387.2 Billion in 2034 registering a CAGR of 8.9%. Our report provides a comprehensive overview of the industry, including key players, market share, growth opportunities and more.

Is the residential solar market down?

The residential solar market is down, not out. Our analysis indicates that the market is likely to revert to more stable long-term growth over the next

several years on the back of strong fundamentals. Almost certainly, surprises will pop up along the way; the industry is not called the solar coaster for nothing.

Why is the US solar market growing so fast?

The U.S. market is expected to witness a prominent growth rate on account of robust federal schemes such as solar investment tax credit, rising demand across public and private sectors for green electricity, and declining panel cost.
