

Democratic Republic of Congo lithium battery energy storage project

Overview

China's Zijin Mining Group plans to begin lithium production in early 2026 at the Manono project in the Democratic Republic of Congo, one of the world's largest deposits of the metal. This would mark Congo's first lithium mine as demand for the battery material grows, despite a current supply glut.

Democratic Republic of Congo lithium battery energy storage project

What are the leading renewable energy storage projects in Congo?

Battery Energy Storage Systems (BESS) represent a crucial link in stabilizing power grids and mitigating supply variability associated with renewable sources. In the DRC, the ...
