

Distribution cabinet cleaning container base station

Overview

What are IBC container washing stations® easy clean design?

IBC container washing stations® Easy Clean Design are engineered for effective cleaning and drying of IBC containers. The washing cycles are programmable according to the bulk materials previously stored. With high-pressure washing, all interior and exterior surfaces of your storage IBC container are sanitized for total hygiene.

How does a container washing station work?

The power of the water jets remove all residual material from the surfaces and prevents cross-contamination. The external cleaning is done via static nozzles strategically set to clean all the container surfaces as well as the top and drain valve. Our automatic container washing station cleans, rinses and dries one container every 15 minutes.

Which chemistries can be used in a container wash system?

Systems can be designed to use aqueous, caustic or solvent cleaning chemistries. Our container wash systems can clean your containers with the chemistries which are most effective for removing your contaminants. Completely integrates with PRI solvent recycling systems.

What is a modular wet cleaning station?

Modular Wet Cleaning Stations offer more flexibility, with the wet station and overhead laminar flow hood as separate units. Terra's Solvent Spray Booth with full stainless steel construction features fire-resistant components and safety systems, ideal for applications with flammable chemical solvents.

What is a container washing system?

Our line of container washing systems are designed for a variety of applications and can be used to clean grease, oil, automotive lubricant, paint, coating, ink and more. Systems can be designed to use aqueous, caustic or

solvent cleaning chemistries – we can help you determine what will be most effective for removing your contaminants.

What is a wafer fabrication cleaning station?

These wafer fabrication cleaning stations are available in integrated and modular configurations. Integrated Wet Cleaning Stations feature one complete turnkey system with built-in Class 100 HEPA filtration, made of acid-resistant polypropylene or solvent-friendly stainless steel.
