

# **Distribution of 5G outdoor base stations in Romania**

## Overview

---

Where is 5G available?

Currently, the 5G network is primarily available in major cities, however, efforts are being made to expand coverage to other areas as well. It is expected that operators are already working on providing the 5G network to stadiums, airports, and other special premises. 5. What public tenders have awarded spectrum licences?

.

Which cities are covered by 5G?

Currently, 5G network coverage is limited to major urban centres including Bucharest, Cluj-Napoca, Oradea, Iași, Sinaia, Bușteni, Predeal, Timișoara, Craiova, Sibiu, Brașov, Poiana Brașov, Constanța and Mamaia. However, with the recent allocation of additional spectrum, we anticipate a wider roll-out of 5G services in the near future. 2.

What is the 5G law?

Law no. 163/2021 (known as the “5G Law”) provides mandatory obligations for 5G infrastructure and equipment providers, which must: be subject to a legal system that enforces transparent corporate practices.

What is a 5G corporate subscription plan?

One major telecom operator has introduced a specialised 5G corporate subscription plan, specifically for fixed-point 5G Wi-Fi solutions (note that the term “5G” refers to 5G mobile communications services and not a 5 GHz Wi-Fi router).

What if 5G is not available?

Where 5G isn't available, the router will connect to the 4G network instead (up to 355.6 Mbps). This subscription plan is for companies that lack access to

fibre optic infrastructure or require high-speed internet back-up solutions. 4.

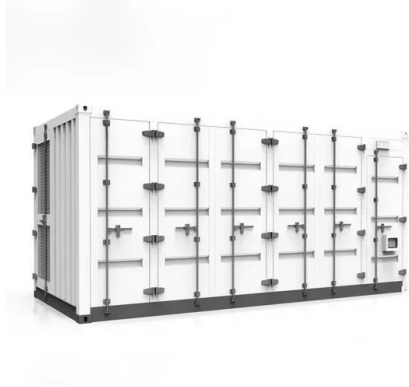

When did ANCOM start granting 5G licences?

On 19 September 2022, ANCOM launched an auction to grant licences for frequencies in the 700 MHz, 1500 MHz, 2600 MHz and 3400-3800 MHz bands (also widely known as the “ 5G tender ”). In 2021 a smaller tender awarded licences for the 800MHz, 2600MHz and 3400MHz-3600MHz bands.
