How much does wholesale electricity cost in Europe?

Wholesale electricity averaged a price of 100.8 euros per MWh in Greece in 2024, Europe's eighth-highest level, data provided by RAAEY, the regulatory authority for energy, has shown. Albania topped the list with the highest wholesale electricity price on the continent this year, at 112 euros per MWh.

What is European power trading?

The majority of European power trading volume is comprised of forwards or futures. This allows generators to hedge against future price volatility. This is in contrast to US markets that see the most volume of trades occurring in day-ahead markets. Intraday spot markets comprise a smaller volume but are growing.

Was 2024 a good year for the European power sector?

2024 was a year of records for the European power sector, according to Eurelectric's data. The only not-so-bright side was demand. Power demand didn't pick up since the crisis, primarily due to low industrial consumption, Eurelectric said. The EU has closed the year with lower electricity prices on average.
