

# Energy Storage Communication BESS Price Trend

## Overview

---

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported by Energy-Storage.news, when CEA launched a new quarterly BESS pricing monitor. How much does a Bess container cost in 2024?

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported by Energy-Storage.news, when CEA launched a new quarterly BESS pricing monitor.

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

Where is Bess based?

China-headquartered Sungrow provided the BESS units for this project in Texas, US. Image: Revolution BESS / Spearmint Energy. After coming down last year, the cost of containerised BESS solutions for US-based buyers will come down a further 18% in 2024, Clean Energy Associates (CEA) said.

How much does Bess cost in China?

It is nonetheless still eye-opening to note just how big those differences in cost are. The average for a turnkey system in China including 1-hour, 2-hour and 4-hour duration BESS was just US\$101/kWh. In the US, the average was US\$236/kWh and in Europe US\$275/kWh, more than double China's average cost.

Why is Bess pricing falling?

The fall in BESS pricing since then is down to a confluence of factors, he explained: “The removal of China’s New Energy Vehicle incentive in 2023, lingering range anxieties among western consumers and a global increase in interest rates cast a pall on the EV market, resulting in a ‘disappointing’ year-on-year growth rate of 31%.

What factors influence Bess prices battery technology?

Key Factors Influencing BESS Prices Battery Technology: Lithium-ion batteries dominate the market, particularly Lithium Iron Phosphate (LFP) and Nickel Manganese Cobalt (NMC) chemistries. LFP has become more popular than the other due to its lower cost and longer lifespan.
