

Established a pack lithium battery assembly company

Overview

What makes a custom lithium-ion battery pack unique?

The foundation of any custom lithium-ion battery pack lies in the selection of the integrated cells. Our cell selection for custom packs involves: Lithium-ion cell advancements continue expanding performance boundaries yearly. Leveraging state-of-the-art cell technology is crucial for maximizing custom pack capabilities.

Where are lithium batteries made?

Big News from Lithium Battery Company! We've expanded with a cutting-edge, fully automated factory at 5201 S Westshore Blvd, Tampa, FL! Advanced lithium-ion battery solutions for defense, medical, marine, and industrial applications, manufactured in our Tampa, FL facility.

How do you make custom lithium-ion battery packs?

Key Takeaway: Manufacturing custom lithium-ion battery packs requires precise engineering, quality control, and safety standards. The process involves gathering requirements, selecting cells, concurrent engineering, prototyping, certification, production planning, and lifecycle support.

What is battery pack assembly?

The battery pack assembly is the process of assembling the positive electrode, negative electrode, and diaphragm into a complete battery. This involves placing the electrodes in a cell casing, adding the electrolyte, and sealing the cell.

What is advanced lithium battery pack design?

Advanced Lithium Battery Pack Design: These custom batteries are made when the customer has special requests for temperature capabilities, dimensions, discharge current, and/or battery cycles. In this case, our chemistries, enclosure, and battery management system (BMS) experts are

required to monitor each project closely.

How do you develop a custom battery solution?

Developing custom battery solutions requires extensive expertise across electrical, mechanical, and quality engineering. While off-the-shelf lithium packs may not fully meet an application's specific power, energy, size, or functionality needs, a custom pack built to unique requirements provides an optimized solution.
